Carbon Emissions Data¹

Greenhouse gas (GHG) emissions scope (tonnes CO₂e)

Total GHG emissions

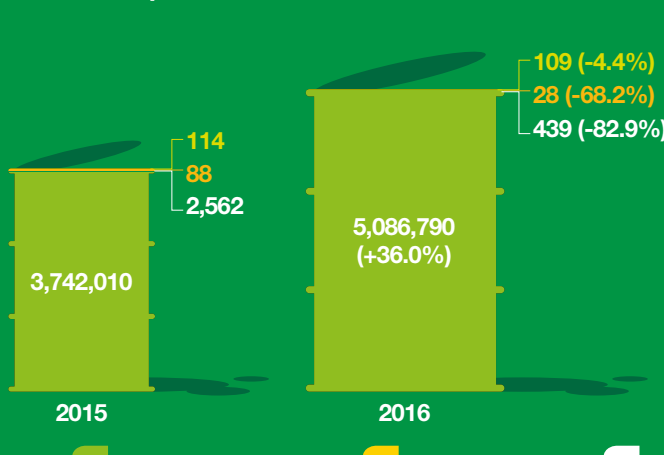

1. We apply "Equity Ratio Method" to adjust our calculation of overall GHG emission, according to the shareholding ratio of every unit. Since the report in 2015 did not adopt the "Equity Ratio Method", the data of 2015 has been adjusted to reflect the adoption of "Equity Ratio Method". On the other hand, this report excluded the recycling data for packaging materials and paper products

While the Group's revenue rose by 20.0% to RMB13.35 billion and the overall emissions rose by only 6.6%, resulting in a 11.1% decrease in the carbon intensity

Scope 1: (Solid, liquid and gaseous fossil fuel combustion)

Resource Consumption

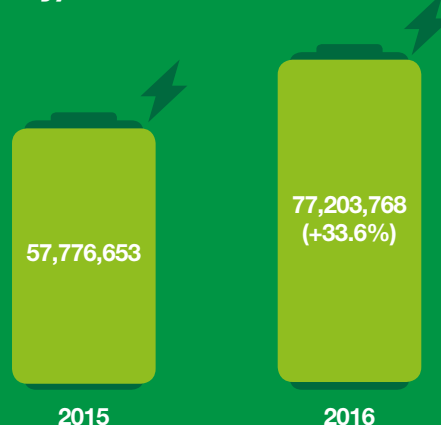

The percentage of GHG emissions of Scope 1 during the year

Scope 2: (Purchased electricity)

Resource Consumption
Purchased electricity (kWh)

1. We apply "Equity Ratio Method" to adjust our calculation of overall GHG emission, according to the shareholding ratio of every unit. Since the report in 2015 did not adopt the "Equity Ratio Method", the data of 2015 has been adjusted to reflect the adoption of "Equity Ratio Method". On the other hand, this report excluded the recycling data for packaging materials and paper products

PROSPECT

Actively respond to the carbon reduction targets in China and relevant sports development policies to promote nationwide sport and fitness so as to enhance the industry standard and develop sports habits for life

Committed to achieving the short to medium-term and medium to long-term targets on environment, society and governance
